Required Knowledge and Experiences:

Other requirements:

Work offered

The student will be part of a team working on projects related to process tomography. The process tomography systems allow to investigate industrial processes and can be widely used in different branches such as pneumatic transport, powder mixing etc. A typical system consists of sensors, measurement unit and computer. An important element of such system is computer software, which allows to analyze tomographic data. The result of the analysis is information about an investigated process. The objective of the project is to develop software for processing and visualizing tomographic data.

Co-worker

Number of weeks offered:	6 - 12	Working environment:	Research and Development
Within the months:	2019/07/01 - 2019/10/11	Gross pay:	850.00 PLN / per month
Holidays:		Deduction to be expected:	0%
